# Terminology

**Select-** This is our #1 grade. Trees will be well branched, healthy and balanced trees.

**Bed Select-** This is a #2 grade. Trees will be healthy, but will be more narrow and less branched than our Select grade. Trees may have small gaps.

**Regular-** Trees are lighter branched, thinner bodies.

**Whip-** Trees are lighter in caliper and haven't developed many (or any) branching yet.

**BR Whip-** Branched Whip. Trees have a little heavier caliper than a whip, and they will have some branching that has started to develop. These will be 25mm in caliper.

**Tree-** These trees will be 30mm in caliper and will have strong, developed branching.

**bb-** Stringball. Trees will come packaged with a burlap sheet around the root ball tied off with rope.

**B&B -** Ball Boy. Trees will come packaged with a burlap sheet and a daisy (wire) basket around the root ball that is tied off with rope.

**WB-** Wire Basket. Trees are machine dug into a large wire basket, with a burlap liner inside, tied off with rope. These trees are dug, loaded and should be planted with equipment. Smaller WB's can be rolled out of a truck or trailer and into the hole, but if planting a large quantity of them, plan on having something available to lift and move the trees with.

**Bare Root-** Trees do not come with a dirt ball on them. They are lifted out of the ground, the dirt is shaken off and they are shipped without any dirt ball. Evergreen trees are bundled together and wrapped in burlap sheets around the roots. Deciduous trees are bundled and tied together to make shipping easier.
